Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • What crop suits my soil this season? • Which crop gives the best yield? • Is my land right for this crop?	THINKS • I must maximize my yield. • I can't afford a failed harvest. • The weather keeps changing.
DOES • Relies on guesswork & local advice. • Follows what neighbours plant. • Tests soil informally, if at all.	FEELS • Anxious about climate & prices. • Unsure which crop to choose. • Hopeful for a profitable season.
