### Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

### Code Layout Checklist:

| S.No | Code Quality Parameter    | Description                                   | Followed (Yes / No / Partial) | Remarks |
|------|---------------------------|-----------------------------------------------|-------------------------------|---------|
| 1    | Consistent Indentation    | Uniform spacing/tabs used throughout the code |                               |         |
| 2    | Proper File Structure     | Files and folders are logically organized     |                               |         |
| 3    | Meaningful Variable Names | Variables reflect their purpose clearly       |                               |         |
| 4    | Function / Method Names   | Functions are descriptively named             |                               |         |
| 5    | Code Comments             | Inline and block comments explain logic       |                               |         |
| 6    | Modular Design            | Code is split into reusable functions/modules |                               |         |
| 7    | No Redundant Code         | Duplicate or unused code is removed           |                               |         |
| 8    | Error Handling            | Exceptions and errors are handled gracefully  |                               |         |

### Reusable Components / Modules:

| S.No | Component / Module Name | Language / Technology | Where Reused | Reusability Level (High / Medium / Low) |
|------|-------------------------|-----------------------|--------------|-----------------------------------------|
| 1    |                         |                       |              |                                         |

|   |  |  |  |  |
|---|--|--|--|--|
| 2 |  |  |  |  |
| 3 |  |  |  |  |
| 4 |  |  |  |  |
| 5 |  |  |  |  |

**Overall Code Quality Assessment:**

| Aspect                   | Rating (1-5) | Comments |
|--------------------------|--------------|----------|
| Code Layout & Structure  |              |          |
| Readability              |              |          |
| Reusability              |              |          |
| Documentation / Comments |              |          |
| Overall Score            |              |          |

## CODE LAYOUT & READABILITY

- Followed PEP 8 guidelines for Python.
- Modular design: `app.py` handles routing, `model_pipeline.py` handles training.
- HTML/CSS is properly indented with descriptive class names (e.g., `.glass-orb`, `.hero`).
